

Change is good

A new approach to Managing Projects

A two day workshop designed for those required to manage their own time and meet specific expectations and deadlines.

What are the benefits?

Participants will be able to:

- Value the difference that planning can have, upon achieving specific outcomes.
- Apply quick and easy to use planning techniques to every day activities.
- Increase efficiency and meet identified objectives.
- Apply feasibility studies and risk assessments.
- Identify realistic requirements of resources.
- Apply performance measuring and monitoring, to evaluate progress.
- Identify the need to keep stakeholders informed of progress.

How much does it cost?

£995 plus VAT, per business, for the two day workshop. This price includes lunch, refreshments and all learning material, held at our Training Facility at Gilberdyke. Up to 5 people per business, per course. (This is equivalent to less than £100 per person, per day.)

Funding may also be available for those businesses which are eligible for the Leadership and Management Fund. The fund will provide a £750 contribution to the cost of training, resulting in the course costing your business only £245 plus VAT.*

How is the learning delivered?

A hands on, activity based workshop, which goes against the trend of prepared slides and tutor lecturing.

Participants consider their own experience and discuss with others, to gain insight into other industries and organisations, to deliver richness and depth to their learning experience.

Who should attend?

Designed for those either responsible for, or involved in, daily or long term projects.
